April 5, 1964

To Lillian and Harold Weisberg:

Because of being under the weather, I've been forced to recon at residence. — Some footage from Oliver Stone's "J.F.K." (the director's cut) has been received. Since you are ~~at~~ work completing your book, and you certainly do not need distractions. —

On the subject of Jack Kennedy's assassination, have you had a chance to interview Dr. Lattimer, one who disagrees with the theory that multiple shooters were utilized in Dealey Plaza?

In Case Closed, Gerald Posner has asserted that a total of 8 rounds had elapsed during time of shootings? This would have allowed Lee Harvey Oswald time to successfully complete tasks (adding validity to lone gunman theory). Can you comment?

During recent gathering, I have made copies of pages from his notebooks in Dallas. Author Sylvia Thompson provided copies from Warren Commission findings. He included the following testimony given by Marge Warren Fisher, Jr.:

At the moment he [illegible] I was almost sitting there. I heard two reports which I thought were alike and that appeared to be completely distinct in sound. Then the first report and were in such rapid succession, that there seemed to be practically no time element between them. At [illegible] time as the President was struck in the right upper rear of his head (18H762)

Fritz Byers, Clint Hill, and Roy Kellerman made similar remarks. The gist of opinion that another assassin was placed in Rel. Dep Building?

I have been reading F.B.I. autopsy report(s) on assassination of Jack Kennedy. Has there been official explanation, regarding statements provided by Francis X. O'Neill, Jr. and James W. Sibert? I am referring to descriptions of wounds to head and neck (P. 374, Duffy and Reese work)

Sincerely,

Al Landesberg Jr.
